

MOVEMENTS IN SECURITIES.

PRICES SHOW LITTLE CHANGE

TRADE CONDITIONS IMPROVED—RAILROAD EARNINGS.

Sunday, Feb. 21—p.m.
Opportunities for making money in legitimate business enterprises are increasing. As yet this is but poorly recognized by Wall Street traders, and in fact, the beneficial effects of business expansion in general have yet to be reflected in the market for stocks. Indications of trade revival are furnished in current returns of railroad earnings, the reports received last week showing most encouraging gains over the corresponding periods last year and over the year before, those compiled by The Tribune for the second week in February exhibiting for thirty-three companies gains of \$328,747, and for sixteen companies losses of \$115,138, a net increase over the same week in 1936 of 4.5 per cent. These gains are not particularly large, but it should be remembered that at this time a year ago traffic earnings were unusually favorable. In the St. Paul Company, for instance, the report for the second week of February this year gave a decrease in gross earnings of \$30,427, but this compared with an increase in the corresponding week in 1936 of \$125,514, so that compared with 1935 there was a gain of \$80,087, and with the exception of last year the earnings were the best for the same period of any year since 1932.

The physical condition of the great majority of railroad companies has been wonderfully improved in the last few years, and the result of the many receiverships has been the reorganization of properties upon more conservative and substantial lines, which, in the present market, must revert to the interest of the stockholders of the companies. Buyers of railroad mortgage issues appreciate the changed condition of affairs in railway management resulting from reorganizations, and they recognize the improvement in the actual value of the properties and the excellent outlook for rapid gains in traffic receipts; but in the market for shares there is no public buying, the daily operations consisting of little else than speculative operations influenced by manipulation and passing developments. The outlook in the foreign political situation at this time is a strong factor in retarding active buying, while the dominating element of the tariff question is awaited by many before taking an interest in securities trading. While a European war would naturally stimulate our industries the effect at first, at least, upon financial markets would be unfavorable because of the close financial relations existing between this country and foreign financial centers, the knowledge of this fact forming the chief factor in the present depression of nervousness in local financial circles wherever affairs abroad appear to be reaching an acute stage. The ultimate effect, however, of a European war would not be disastrous to our securities market, and in the present depression, troubles there appear no adequate reason for alarm over the possible effect upon this country. Nor need holders of securities worry themselves over the legalistic investigations of the recent years of business depression have left the speculative community unsettled and fearful of entering into active stock trading, but a change must soon come over the sentiment of the market, and the affairs of the country cannot long fail to impress the stock exchange circles and bring an active outside support to share trading. Wall Street, contrary to common belief, is not particularly depressed. The current market is dull and narrow. Trading is confined almost entirely to the chief speculative favorites, with no important variation in price movements, but as soon as the public and the speculative element become convinced that industrial growth and expansion are to be permanent, and high priced stocks, like Lake Shore and New York Central, and others, will be more conspicuous at the end of the week by reason of marked advances in their market values, the first-named reaching their highest price on record and the last gaining 10 per cent in 17 days, due to successful efforts made in financing its outstanding indebtedness and in providing for refunding the obligations of its branch lines that mature in the near future.

This company amounts to about the sum paid for the control of the New-England Railroad, the details of the transaction having already been printed in the news columns of The Tribune.

THE MONEY MARKET.

The local money markets continued easy last week, with an improved demand for accommodation loans, and in the present depression, the principal part of money received coming from points near this city. The rate for New-York funds at Chicago changed from 35 to 36 per cent for six months, and the week, and reports from the South and West indicated a good supply of cash in all quarters. Sub-Treasury operations with the banks caused a loss to the Treasury of \$1,000,000, and the banks gained in cash holdings \$5,176,000 and in surplus reserve \$4,027,725. Money on call representing bankers' balances ruled at 1 1/2 to 1 3/4 per cent, banks maintaining 1 1/2 per cent. Receipts of currency from the Federal Reserve Bank of New York were \$1,000,000, and in providing for refunding the obligations of its branch lines that mature in the near future.

RAILROAD EARNINGS.

The Tribune has printed the gross earnings of sixty-one railroads or systems for the first week in February. Of these thirty-nine return gains of \$222,747, or 0.5 per cent, and twenty-two return losses of \$148,140, or 0.5 per cent. The whole shows a gain of \$174,607, or 0.1 per cent. The Tribune has also printed the gross earnings of forty-nine railroads or systems for the second week in February, of which thirty-three return gains of \$328,747, or 12.2 per cent, and sixteen return losses of \$115,138, or 0.6 per cent. The whole shows a gain of \$213,609, or 4.5 per cent.
